

Your Reliable & Experienced Partner in China Contract Manufacturing

Vincent Medical Mfg. Co., Ltd. is a Hong Kong company providing contract manufacturing services for high quality medical devices. Our wholly owned factory in Dong Guan City, Guangdong Province, China is a 30,000 sq. meters facility and offers "turn-key" manufacturing in a safe, proven, repeatable process. The production facilities include Class 100,000 clean room for assembly and injection molding as well as controlled environment and traditional manufacturing environments.

From prototype development to trial runs and full-scale production, Vincent Medical provides extensive engineering and manufacturing support services. We control the process from prototype development, mold building, injection molding, decorating, assembly, packaging, validation and sterilization, logistics and supply chain management ... a full medical device contract manufacturing service.

Turnkey Finished Goods Medical Devices Contract Manufacturing

- Plastic Injection Molding
- Plastic Extrusion and Corrugation
- Blow Molding
- Clean Room Assembly
- Ultrasonic, High Frequency & Heat Welding
- Die Cutting
- Metal Stamping
- Pad & Silk Screen Printing
- Packaging, Labeling, Bar-Coding
- Vacuum Forming Packaging
- On-site EtO Sterilization
- Cut and Sew
- Electronic Assembly

Quality Systems

- U.S. FDA Registration
- ISO9001:2000 / ISO13485:2003
- EN550 / ISO11135
- GMP compliant

Our comprehensive quality assurance program include:

- Injection Mold Qualification and Validation Processes
- Incoming inspection and monitoring of all raw materials
- In process monitoring and verification of manufacturing processes
- 100% FQC and sampling OQA and testing
- Rigid compliance to customer's documentation
- Adhere to ISO9001 and ISO 13485 quality systems
